2. (A) Read the following passage and answer the questions in your own words : 5

In Mathematics the ancient Indians made epoch making discoveries, notably that of the zero sign, of the decimal place-value system, of the use of the minus sign, and the use in algebra of letters of the alphabet to denote unknown quantities. It is difficult to date these, as there was always a big time-lag between the discovery and its practical application. But it is clear that the beginning of arithmetic, algebra and geometry were laid in the earliest period. Ten formed the basis of enumeration in India even at the time of Rigveda. The time and number sense of the ancient Indians were extraordinary. They had a long series of number names for very high numerals. The Greeks, Romans, Persians and Arabs had apparently no technology for

(A-7)

denominations above the thousand or at most the myriad ( $10^4 = 10,000$ ).

Questions :

- (i) What were the discoveries made by ancient Indians in the field of Mathematics ?
- (ii) Why is it difficult to date these discoveries ?
- (iii) Which number did form the basis of enumeration in ancient India ?
- (iv) What is clearly known about beginning of arithmetic, algebra and geometry ?
- (v) Give a suitable title to the passage.

(B) Give antonyms of the following words (any five) :

5

- (i) triumph
- (ii) simple
- (iii) mortal
- (iv) powerful
- (v) maximum
- (vi) slow
- (vii) away
- (viii) attack

(C) Make the following words negative by using appropriate prefixes (any five) : 5

- (i) pure
- (ii) complete
- (iii) aware
